

IMMERSION-SECURITY

MASTER SAFETY MEASURES ON INDUSTRIAL SITES

Véolia Propreté is in charge of waste recycling and valorization. It operates through about 500 sites across the territory.

GOAL

Dynamically train personnel on **mastering security procedures** regarding waste evacuation on Veolia's sites.

TARGETS

Industrial waste collection truck drivers

FORMATS

OUR SOLUTION

A **simulator** placing employees in a virtual environment. This simulator allows employees to **learn the safety procedures** and to **test and check** their knowledge.

- A realistic immersion
- 3 modules covering the collection process
- A theoretical course, a practical course and a test phase
- A pedagogical assessment at the end of the process.

This innovative tool is **part of Veolia trainers' toolkit** and is used for training, evaluation and re-induction.

It is easy to deploy and **allows to train employees without having to actually use the productive equipment.**
